```
Administrator: C:\windows\system32\cmd.exe

Command line: prism -importstates 'e:\SymStates.txt' -importtrans 'e:\SymTran.tx
t' -mdp

Importing model (MDP) from "e:\SymTran.txt", "e:\SymStates.txt"...

-----------------------------------------------------------------

Building model...

Computing reachable states...

Reachability (BFS): 17 iterations in 0.00 seconds (average 0.000176, setup 0.00)

Time for model construction: 0.07 seconds.

Type:        MDP
States:      136 (1 initial)
Transitions: 467
Choices:     405

Transition matrix: 1113 nodes (3 terminal), 467 minterms, vars: 11r/11c/4nd
